WORK EXPERIENCE

Walmart - E-commerce Platform

Santiago, Chile

Full-Stack Developer

2023 – 2024

- Engineered scalable Next.js/React e-commerce features and GraphQL integrations for customer-facing commerce workflows.
- Built a reusable frontend architecture and responsive components, enhancing consistency and maintainability across the platform.
- Optimized caching and data transfer to enhance application responsiveness and the customer experience.

RIMAC - Enterprise Insurance Platform

Lima, Peru

Full-Stack Developer

2022 – 2023

- Modernized an enterprise insurance application serving 100K+ monthly active users using Next.js, React, TypeScript, and Node.js.
- Led the migration of the legacy system to Next.js and designed a Node.js BFF layer connecting the frontend with multiple backend services.
- Optimized PostgreSQL data models and queries, delivering a 40% improvement in query performance.
- Enhanced frontend responsiveness through SSR, strategic caching, code splitting, and optimized data retrieval.

Swile - Website Modernization

Montpellier, France

Frontend Developer

2021

- Engineered 12+ reusable React/Next.js components for a CMS-driven platform serving 50K+ monthly visitors.
- Implemented a responsive, SEO-focused frontend with structured metadata and performance optimizations.
- Established reusable UI patterns to improve consistency and reduce frontend code duplication.

EDUCATION

Jessup University - B.S., Computer Science

2016

Rocklin, CA
